Speed, precision
& design

i-mop XL[®]

The first of its kind, the i-mop solves the problems of floor cleaning systems by combining the flexibility of a floor mop with the power and speed of industrial scrubber dryers. We found out that most areas are still being cleaned by mop and bucket, because other floor machines are just not flexible enough to work in most spaces. The i-mop makes it possible to clean any surface, with freedom of movement and great ease of use. No borders or boundaries. This machine isn't just designed for cleaning, it is designed for the cleaner.

Full size scrubber dryer with the flexibility of a flat mop

scrub & dry

- 46 cm cleaning path
- 2 powerful brush motors
- Nylon protective bumper
- Cleans right up to the edge

extreme mobility

- Low profile deck to clean underneath objects
- 360° of flexibility

click on / click off

- Easy to fill, clean & empty above a sink
- Use different tanks for different chemicals
- Reduce unproductive refill waiting time by prepping in advance according to HACCP standards.

power mix

- Choose how you power your i-mop
- Runs on i-power 9 or 14 batteries
- Choose your charging speed with i-charge 2 or 9
- 2 sets = 24/7 power
- Change your batteries in an instant

easy transport

- Transport wheels
- Fits in the trunk of a car
- Easy to store & carry upstairs
- 100% mobility

7cm

Low profile deck

the box

Flexible and fast!

The i-mop features a high speed twin brush scrubber dryer deck with a working area of 46 cm (18 inches), with unmatched agility. The two counter rotating brushes give you a smooth experience and allow you to control the machine even with one hand. Clean around and underneath objects, just like a mop.

Do more with less!

Our quick exchange i-power battery system makes the i-mop a real cleaning workhorse. With 2 sets of i-power 9 your i-mop will never need to take a nap. Clean from 9 to 5 or 24/7 with a single machine. No cords to trip over or get tangled up, just switch on and away you go.

Click on / click off!

Fill, refill and empty the machine easily.

No longer bound to installed filling stations, get your water from a sink in a pinch. Switching between chemicals in a matter of seconds by clicking on a different solution tank. You will be surprised by how water efficient the i-mop is. Good things do come in smaller packages.

Eco-mode

Our eco-mode allows you to save additional water when only a little is needed and also protects your water sensitive floors against overexposure.

Flip the switch!

No PhD required to operate the machine, we have done all the programming for you. A simple dial to select the desired operating mode.

i-mop XL plus

I go, where you go!

The i-mop has been designed in such a way that it takes up very little floor space when not being used. Store it in a closet within reach. Take it with you up and down steps and stairs. Pop off the batteries and lift the water tank from the machine to load it into the trunk of a car.

Faster

Cleans 10 times faster than conventional wet mopping, backed-up by cleaning capacity of up to 1800 m² per hour.

Cleaner

Powerful twin counter-rotating 350 RPM brushes for soil removal validated by ATP test data reflecting up to 90% cleaner surfaces.

Greener

Makes every ounce of chemical and every drop of water count proven to reduce environmental impact by over 75%.

Safer

Floors that dry almost instantly reduce slip and fall hazards, validated by standardized slip test readings of 120 or less.

...and better for everyone!

Changes the experience of cleaning, and brings energy, pride and positive morale to the facility... not to mention a cleaner and healthier environment.

2 Control Panel	✓		✓
3 Splash guards	✓		✓
4 Floating ball system	✓		✓
5 Electronic switch	-		✓
6 Timer display	-		✓
7 Coating	-		✓

i-mop Basic

Optimal user experience

All features of the Basic versions are also included in the Plus and Pro version

1

Battery safety guard

Experience showed us that a lot of operators forget to turn the machine off after finishing their cleaning job. This often results in drained batteries. With this upgrade we made this a thing of the past. When the i-mop is turned on in Park Mode, the i-mop stays off. This prevents the battery from draining during a regular workday, or when it is being stored. Only when you put the i-mop in its working position (when you lower the brush-decks), the battery switches on. This creates optimal battery usage and usability for the cleaner.

3

Splash guards

Another advantage of this battery safety feature is that the brushes are not rotating whilst moving from point a to b. This prevents the brushes from splashing against people walking by and undoing your cleaning. Even when the i-mop is in working mode there will be no splashing. The splash guards on both sides of the brush deck prevent water from splashing.

2

Control panel

The control panel of the new Basic version of the i-mop XL has lower inlay and a bumper which makes it easier to work with and it prevents damage to the sides.

4

Floating ball system

We have created a new filter system for the recovery tank. There is a floating ball inserted in the filtration element which pops-up when the tank is full. This will close the tank and prevent water from overflowing. To protect the engines the i-mop will also stop extracting any residue from the floor. This will avoid water from entering the suction motor via the tank.

i-mop Pro

The **i-mop Pro** also has the same extra features as the i-mop Plus.

**Designed to
clean facility's
at swimming
pools and
beach areas**

7

Coating

The i-mop Pro has a coating on the scrubber deck which protects the i-mop against salt and chloride.

Power up

Space is in short supply these days. We should not waste a single inch when it comes to the limited storage space we can even get. That's why we thought: why not use the vertical option towards the ceiling for charging your batteries? You only need one power socket for multiple chargers. Now you can easily attach, hook-up, and power your batteries without losing precious space!

Technical specifications

Application	Indoor, hard surfaces only
Theoretical performance	Up to 1800 m ² per hour
Practical performance	1000 - 1300 m ² per hour
Brush speed	350 RPM
Brush pressure	22,5 kg
Operation width	46 cm
Size machine (l x w x h)	50 x 38 x 120 cm
Weight without batteries & water	18.5 kg
Clean water tank	4 L
Recovery clean tank	4-6 L (max. 8 L)
Material	PP, Aluminum alloy
Power source	2 i-power 9 batteries*
Battery	24V - 8.8 Ah
Run time	60 minutes
Charger type	Off-board*
Charger	110-240V, 50/60Hz

* Batteries and charger can be ordered separately.
