

Crystallisation powder - 5 kg

GENERAL

Powder for long-lasting crystallisation of natural calciferous stone.

- Seals pores, makes maintenance easier and creates long-lasting and brilliant shine.

pH 1,9

Suited for

Natural stone, acid sensitive (limestone) - Flooring in concrete, poly-concrete, unglazed tiles and cement based composite floors

USAGE

- Clean the floor thoroughly and rinse well.
- Spread about 50 grams of powder per m² on the floor.
- Add water so that the powder becomes a paste.
- Then polish the floor with a low-speed machine and a Porko pad for 2-3 minutes per m².
- Then add extra water and vacuum the paste with a water vacuum cleaner.
- Finally rinse well and draw up the water again.
- When the floor is dry, all residue can be removed with a low or high speed machine and a 3M white polishing pad.

Efficiency: maximum 10m² per hour.

Crystallisation powder - 5 kg

TECHNICAL SPECIFICATIONS

Dimensions product (LxHxW) 24 x 19.5 x 24 cm

LOGISTIC DATA

Product

Article	816111
Unit	Bucket
Dimensions	24 x 19.5 x 24 cm
Gross weight	5232 g
Net weight	5200 g
EAN code	5420015500022

Packing

Quantity per packing	1
