

## DESCRIPTION

With the Level Control System and a suction device, the alarm level of any kind of chemical product contained in the can may be monitored.

## TECHNICAL CHARACTERISTICS

|                                            |                              |
|--------------------------------------------|------------------------------|
| <b>Power supply</b>                        | 230 Vac 50/60 Hz             |
| <b>Maximum power employed</b>              | 4 W                          |
| <b>Number of level sensor inputs</b>       | 7 optoinsulated              |
| <b>Probes input</b>                        | Low-voltage contact          |
| <b>Degree of protection</b>                | IP 65                        |
| <b>Alarm Output</b>                        | 250V 8A max NO relay contact |
| <b>Environmental Operating Temperature</b> | 5 ÷ 50°C                     |
| <b>Storage Temperature</b>                 | -40 ÷ 85°C                   |

## DIMENSION
